Asia Pacific Society of Head & Neck Radiology

First Annual Meeting
May 22 - 23 2026

Bali

 Renaissance Bali
Uluwatu Indonesia

COLLABORATIVE SESSIONS WITH:

Dear
COLLEAGUES AND FRIENDS,

On behalf of the founding committee, it is my great pleasure to welcome you to the First Annual Meeting of the Asia Pacific Society of Head and Neck Radiology (APSHNR), taking place on 22–23 May 2026 in Bali, Indonesia. This meeting marks an important milestone as the inaugural scientific gathering of our newly established society and the beginning of what we hope will become a vibrant and enduring platform for collaboration in our field.

APSHNR was created to bring together radiologists and allied specialists across the Asia-Pacific region who share a passion for advancing the science and practice of Head and Neck imaging. Our region spans extraordinary diverse healthcare systems, patient populations, and clinical challenges. APSHNR aims to provide a forum for education, research collaboration, and the exchange of expertise, strengthening professional connections across countries while promoting excellence in imaging, diagnosis, and patient care.

Our inaugural Meeting reflects this mission. Over two days, participants will engage with an outstanding international faculty through lectures, panel discussions, and presentations of original research and educational exhibits. The scientific program will explore key topics in Head and Neck Radiology, including advances in sinonasal, salivary gland imaging, skull base and temporal bone pathology, oncologic imaging, and emerging techniques shaping the future of our specialty.

We are especially pleased that this first meeting will feature collaborative sessions with several leading international societies, including the American Society of Head and Neck Radiology, the European Society of Head and Neck Radiology, the Asian Oceanian Society of Neuroradiology Head & Neck Radiology. These sessions will highlight the shared expertise and global partnerships that are central to advancing our specialty. Each morning will begin with engaging “wake-up case” sessions, delivered in collaboration with The Cortex Club and SPIN Academics (paediatric) providing stimulating case-based discussions.

We are delighted to host this historic first meeting at the Renaissance Bali Uluwatu Resort & Spa, an exceptional venue set atop the cliffs of the Bukit Peninsula with sweeping views of the Indian Ocean. The inspiring surroundings provide an ideal setting for both scientific exchange and collegial interaction.

Few destinations in the world combine natural beauty, culture, and hospitality as wonderfully as Bali. Known as the “Island of the Gods,” Bali offers lush tropical landscapes, dramatic coastlines, and a rich cultural heritage expressed through its temples, art, and traditions. Visitors can explore historical places of worship experience world-renowned Balinese cuisine, or simply enjoy the serenity of the island’s beaches and sunsets. It is our hope that you will take time to enjoy the unique charm and warmth of this remarkable destination while connecting with colleagues and friends from across the globe.

This inaugural meeting represents more than just a scientific gathering—it marks the beginning of a new regional community dedicated to advancing Head and Neck Radiology in the Asia-Pacific and beyond. I am deeply grateful to our Founding Committee, Local Organizing Committee, faculty, sponsors, and partners whose enthusiasm and hard work have made this meeting possible.

I look forward to welcoming you to Bali and sharing with you what promises to be an exciting and memorable first chapter in the story of APSHNR.

Warm regards,

Dr Salman Qureshi
Congress President

2. All abstracts must be submitted via the Abstract Submission Portal by **30 March 2026**.
3. Submissions via email or other formats will not be accepted.
4. Submission categories include
 - o Scientific Oral Presentation
 - o E-Posters
 - i. Scientific Exhibit
 - ii. Educational Exhibit
5. The scientific oral presentations should be original studies done by presenter and in the format below
 - a. Title of the Paper.
 - b. Author
 - c. Affiliation (Institution to which the author is attached)
 - d. Aim
 - e. Materials and Methods
 - f. Results
 - g. Conclusion
6. E-Poster Submission
7. Abstract Must Be Any Topic Related To Head & Neck Imaging

Scientific exhibits :

The abstract should be submitted online in the same format as that of oral scientific paper presentations (please see above).

Educational exhibits :

This category will include presentations which highlight the spectrum of imaging findings in a disease entity, review radiological signs, radiological-pathological correlation or describe a radiological procedure.

The abstract for educational exhibit should be submitted online in the following format :

- a. Title of the Paper.
 - b. Author
 - c. Affiliation (Institution to which the author is attached)
 - d. Aim
 - e. Materials and Methods
 - f. Results
 - g. Conclusion
6. E-Poster Submission

9. Abstracts and presentations must be written in English.
10. The abstract body is limited to 300 words, excluding the title, author names, and institutional affiliations.

Friday, May 22 conference meal will be at an additional cost, details to be confirmed in due course.

LEARNING OBJECTIVES/CME:

Learning objectives

- Recommend CT and MR protocols for the skull base, temporal bone and neck that address important common and uncommon disease processes.
- Learn the key anatomic landmarks on CT and MR imaging that delineate spaces and tumor subsites, and may be important for surgery and radiation planning.
- Understand the critical role that radiologists play in the initial staging of head and neck tumors and in ongoing surveillance after treatment.
- Recognize critical imaging features to distinguish head and neck masses and recognize common mimics and complications of treatment.
- Distinguish important sinonasal, orbital and maxillofacial pathologies, and develop differentials for patients with acute and emergent head and neck presentations.

CPD / CME Credits

This course provides 12 CPD credits in accordance with the CPD Scheme of The Royal College of Radiologists United Kingdom
